

Marco Ambrosetti - CV

Marco Ambrosetti is a chemical researcher at *Ricerca sul Sistema Energetico (RSE)*, where he has been working since December 2023. He earned both degrees in Chemistry and Ph.D. in Chemical-Pharmaceutical Sciences and Industrial Innovation from the University of Pavia. His research focuses on the design, synthesis, physicochemical and electrochemical characterization of innovative anode materials for sodium-ion batteries, with particular emphasis on carbon-based materials, metals, and metal oxides. Additionally, he works on the preparation, physicochemical and electrochemical characterization of cathode materials and solid electrolytes for sodium-ion batteries.
