

Short Bio

Riccardo Apreda is partner and Technology Leader at Erre Quadro s.r.l., a company specialized in the development of AI-based cognitive engines for the automated analysis of technical documentation.

After a PhD and a few years of academic research in Theoretical Physics, he pivoted from university to entrepreneurship, co-founding Erre Quadro to bridge scientific expertise with real-world impact.

Initially serving as Managing Director, he now focuses on forging connections between internal R&D and business development, ensuring innovative ideas translate into market-ready solutions. He also supervised over a hundred projects for diverse clients, from large corporations to international institutions, and authored several scientific papers as well as four patents.
