Breve CV: Damiano Bandelli studied chemistry at the University of Florence (B.Sc. and M.Sc.). In 2016 he started his PhD studies at the University of Jena (Germany) under the supervision of Prof. U. S. Schubert on the synthesis of new degradable materials for applications in nanomedicine. In 2020 he joined the Center for Colloid and Surface Science (CSGI) in Florence where he worked in the European projects APACHE and GREENART on the development of new materials for cultural heritage preservation. From 2023 he is researcher (RTD-A) at the Department of Chemistry “U, Schiff”, University of Florence, where he is developing and studying new, “greener” materials and products for the preservation and the cleaning of works of art.n.
