

## **Rocco Cancelliere - CV**

Rocco Cancelliere is a Research Scientist at the Italian National Agency for New Technologies, Energy and Sustainable Economic Development (ENEA). He holds a PhD in Analytical Chemistry from the University of Rome Tor Vergata, where his research focused on the electrochemical applications of green carbonaceous nanomaterials, such as biochar. At ENEA, his current work focuses on recycling spent lithium-ion batteries (LIBs) to develop sustainable processes for recovering critical raw materials. He has authored over 30 peer-reviewed publications and actively participates in international research collaborations.
