

Massimo Cuscunà - CV

He is a Scientist at the Institute on Nanotechnology (NANOTEC) of the National Research Council (CNR) since 2012, where he currently leads the Nanofabrication Facility. Having obtained his PhD in Physics from the University of “Roma TRE” (Rome) in 2006, he is author and co-author of more than 80 peer reviewed publications and 2 International Patents.

Research Activity:

- Design and development of new materials for solid state hydrogen storage aimed to a sustainable future;
- Design and development of plasmonic nanostructures for biosensing applications.
