

Thomas Damitz, Euramet - CV

He manages the European Metrology Networks (EMNs), a strategic initiative under EURAMET aimed at fostering European research collaboration and smart specialisation across key areas of metrology. Currently coordinating 11 active networks—with additional ones in development—EMNs plays a central role in shaping Europe's metrological infrastructure to better support industry, policy, and society through shared research and capabilities. Before joining EURAMET, Thomas Damitz worked at the Physikalisch-Technische Bundesanstalt, the German national metrology institute, in a technology transfer capacity, focusing on industry engagement with patents and licencing agreements.
