Sabrina Gualtieri, CNR-ISSMC

Sabrina Gualtieri is a senior researcher of ISSMC and member of CHross Lab. She has a multi-year experience in the study of ancient ceramics and natural and artificial stones (from archaeological excavations and museum). She is also interested in the study of ceramic raw materials, and in the development of products and processes for restoration and green building (geopolymers and cementitious and hydraulic mortars). She is authors of several scientific articles, books; her activity is also devoted to the dissemination with the organization of workshops, events and national conferences on cultural Heritage.
