

## **Sarah McKibbin**

### Biosketch:

Her current position is as a research engineer at Lund Nano Lab at Lund University in Sweden. Her specialisation is photolithography including Displacement Talbot Lithography and Direct Laser Writing, and has an interest in sustainability to minimise the environmental impact of research. Her main research interests are using synchrotron light for high resolution structural and electrical characterisation of nanoparticles, III-V nanowires and novel device materials. She received a PhD in Physics from the University of New South Wales, in Australia in 2013.
