

Sara Nocentini - CV

She got her International Doctorate in Atomic and Molecular Photonics at the European Laboratory for Nonlinear Spectroscopy in Florence in 2017 where she had a Post-Doc Position for 2 years. Since 2019, she is a researcher at the National Institute of Metrological Research (INRiM) in Turin in the division of Advanced Materials Metrology & Life Sciences of INRiM. She was awarded with a PRIN project Photag in 2022 and an ERC Starting grant in 2024. Her research interests and activities include smart responsive polymers for photonics, micro robotics and cryptography.
