Simone Quaranta - CV

Dr. Simone Quaranta Currently he works as researcher at Institute of for the Study of Nanostructured Materials (ISMN) of the Italian National Research Council. His recent research interests include the reuse of industrial waste for energy and environmental remediation applications. Particularly, he has been investigating the recovery of critical raw materials from Italian and Brazilian Amazon rainforest industrial residues (mining, agriculture, fishery) to be used as battery active materials, fertilizers, and adsorbents for environmental remediation.
