

Eugenio Vocaturo - CV

Eugenio Vocaturo is a Researcher at CNR–NANOTEC (Rende, Italy), where he leads the Artificial Intelligence Laboratory. He holds a PhD in ICT and national qualifications as Associate Professor in Computer Engineering and Computer Science. His research focuses on AI, XAI, MIL, and computer vision, with applications in biomedicine, agritech, digital heritage, and public health. He has authored over 90 publications and developed systems like Covid Scanner and MAizeNet, recognized for their transparency and hybrid AI approaches.

He teaches undergraduate and graduate courses at the University of Calabria and is an invited lecturer in international PhD programs (e.g., Manipal University, Lincoln College). He mentors theses in bioinformatics, data science, and tourism. Since 2024, he serves as an ANVUR GEV expert for ING-INF/05. He organizes international workshops such as AI & Big Data vs Pandemics (IEEE-BIBM) and AIDA (IEEE Big Data), and collaborates with top academic institutions worldwide. He is a member of IEEE, SIBIM, AIXIA, and HL7 Italy.
